PREFACE

This report is the fifth consecutive Fiscal Year Statistical Report from the Management Services Section of the Texas Department of Corrections. As with previous fiscal reports and other statistical reports, it is designed to present a statistical summary of the demographic information of inmates who were admitted to, released from, and confined in the Texas Department of Corrections. The time period which this report covers is September 1, 1980 through August 31, 1981, which is of course the 1981 fiscal year.

The primary data source for this document was the data processing files of the Department of Corrections. These data files are updated regularly with information furnished by the Bureau of Records and Classification. Other data sources included Windham School District, the FBI's Uniform Crime Reports, and the Texas Employment Commission.

Although the Fiscal Year Statistical Report is primarily a descriptive document, its basic purposes extend beyond its purely descriptive nature. These purposes are:

1. It serves as a historical report of the demographic characteristics of the inmate population for the fiscal year 1981.
2. It provides management with necessary data for the effective and efficient operation of the Department.
3. It provides the public with a fiscal year record of the characteristics of adult felony inmates in the State of Texas.
4. It serves as a resource document in crime and criminology.

FISCAL YEAR STATISTICAL REPORT

INTRODUCTION

INTRODUCTION

The data contained in this document are primarily of a descriptive nature and are therefore self-explanatory. However, the following brief narrative, along with a list of pertinent definitions, will facilitate the reader's understanding of the Fiscal Year Statistical Report.

DEFINITIONS OF TERMS

Inmates Admitted: The admissions category represents actual persons received by the Department; it excludes all paperwork-only receives. This category contains two actual receives categories: admissions and admissions voluntarily surrendered.

Inmates Discharged: The inmates discharged category represents actual persons discharged by the Department; it excludes all paperwork-only discharges. This category contains three actual discharge categories: discharges--expiration of sentence, discharges--hold, and discharges--court order.

Inmates Paroled: Inmates paroled are actual persons paroled from the Department; all "paperwork only" paroles are excluded. Three categories are represented: paroled, paroled--hold, and paroles--reinstatement.

Inmates on Hand: The inmates on hand category represents the actual number of inmates physically present at the end of any stated workday. For the purpose of this report, on-hand categories are for August 31, 1981.

SMSA: The SMSA is a standard metropolitan statistical area generally made up of a core city with a population of 50,000 or more inhabitants and the surrounding county or counties which share certain metropolitan characteristics.

Mandatory Supervision: This category includes only those felons whose offenses occurred on or after August 29, 1977; this is the effective date of an amendment to Article 42.12 of the Texas Code of Criminal Procedure to include mandatory supervision of all dischargees of the Texas Department of Corrections. Before the amendment only parolees were under supervision after leaving the prison. The period of mandatory supervision is equivalent to the maximum sentence length less calendar time actually served on the sentence.

Parole Violators: This category includes all inmates who were returned to the Texas Department of Corrections as a result of violating the conditions of their parole.

Mandatory Supervision Violators: This category includes all inmates who have been returned to the Texas Department of Corrections as a result of violating the conditions of their release under Mandatory Supervision.

Shock Probation: This category has not been included due to the lack of adequate available data. This is the result of the fact that TDC is not always notified when an inmate on bench warrant has been released on shock probation. This type of sentencing and discharging was introduced by the 65th Texas Legislature. It granted authority to the judges to sentence offenders to TDC for a period of no more than 120 days and no less than 60. Only first offenders who are sentenced to less than 10 years and who committed crimes other than robbery, criminal homicide or rape are affected by this law (ART. 42.12, Sec. 3e). Once released from TDC, they are under supervision of a probation officer.

POPULATION TRENDS AND CHARACTERISTICS

On August 31, 1981, the TDC inmate population was 30,315. One year earlier it was 28,543; thus, TDC experienced an increase in population of 6.21 percent during the 1981 fiscal year.

The increase in population from the 1980 fiscal year to the 1981 fiscal year can be partially explained by the following facts concerning inmate population flow:

1. Admissions - During the 1981 fiscal year there were 13,455 inmates admitted to TDC, an increase of 10.96 percent over the 12,126 inmates admitted during the 1980 fiscal year.

2. Dischargees - There was a decrease of 20.66 percent in the number of inmates discharged from fiscal year 1981 over fiscal year 1980. This translates into 502 fewer inmates discharged in 1981; there were 2,430 discharged in 1980 and 1,928 discharged in 1981. The decrease in discharges is a result of the implementation of the Mandatory Supervision Release Law. The number of people released through discharge will continue to

decrease as the number of people released under Mandatory Supervision increases.

3. Mandatory Supervision - The number of inmates released under Mandatory Supervision during fiscal year 1981 increased to 3,331. This was an increase of 58.02 percent above the 2,108 inmates released under Mandatory Supervision during fiscal year 1980. As of August 31, 1981, 18294 inmates or 60.35 percent of the on-hand population was eligible for release under Mandatory Supervision. This compares to 14,775 inmates or 51.76 percent of the on-hand population as of August 31, 1980.

4. Parolees - During the 1981 fiscal year there were 7,465 inmates paroled. This represents a increase of 47.18 percent or 2,393 inmates from the 1980 fiscal year when 5,072 inmates were paroled.

5. Mandatory Supervision Violators - The number of inmates returned to TDC as Mandatory Supervision Violators increased significantly from 208 during fiscal year 1980 to 492 during fiscal year 1981. This large increase is, at least, partially explained by the 116.06 percent increase in the number of individuals who comprised the population at risk. That is, those people who had been released under Mandatory Supervision and, thus, were candidates for revocation due to violation of the terms of their release.

6. Parole Violators - During fiscal year 1981 the number of Parole Violators returned to TDC decreased to 1,755 from the 1,842 Parole Violators in fiscal year 1980. This was a decrease of 4.72 percent.

Analysis of the population flow reveals an increase of 10.76 percent in the number of inmates admitted, however, this was offset by an increase of 32.40 percent in the number of inmates released. The significant increase in the number of inmates paroled was more than offset by the increased number admitted. This resulted in the increase in the number of inmates on hand.

The ethnic compcsition of those inmates who were incarcerated in TDC during the 1981 fiscal year was very similar to that of the 1980 fiscal year as well as those of previous calendar years. For the on-hand population, August 31, 1981, the ethnic distribution was as follows: Blacks - 43.58 percent, Caucasians - 37.92 percent, and Mexican Americans - 18.50 percent. On the same date in 1980, the distribution was: Blacks - 43.10 percent, Caucasians - 39.39 percent, and Mexican-Americans - 18.51 percent. The similarity of ethnic distributions between the two years remained consistent for inmates admitted, discharged and paroled.

There were no significant changes in the mean I.Q. scores for fiscal year 1981 compared with fiscal year 1980. The mean I.Q. score for the inmates on-hand during fiscal year 1981 was 87.42.

While there appears to have been a significant change in the mean sentence length for the inmates on hand August 31, 1981 (20.67 years) when compared to the mean sentence length for the inmates on-hand August 31, 1980 (23.93 years), this is due to the method used for the calculations. The fiscal year 1980 mean sentence length was calculated using 99 years for life sentences. Due to the use of 60 years as a basis for calculating parole eligibility for those inmates with life sentences, the 1981 fiscal year calculations are based on 60 years for a life sentence.

With a mean age of 29.67 in fiscal year 1981, there was no significant change from the mean age of 29.66 in fiscal year 1980.

The distribution of offenses committed by inmates incarcerated during the 1981 fiscal year was in all categories of on-hand, discharges, paroles and admitted, very similar to that of the 1980 fiscal year. The crimes for which the majority of TDC inmates were incarcerated were, in rank order: burglary, robbery , and homicide.

CONCLUSION

In summary, the population characteristics of those inmates who were incarcerated in TDC during the 1981 fiscal year showed no conspicuous difference from those of 1980 or other years.

It should be emphasized that this document is presented as a descriptive study of the demographic characteristics of TDC's inmate population. The reader should, therefore, exercise caution when attempting to infer from the described data to cause-effect relationships.
